PROFILE

A motivated BCA student passionate about building intuitive and high-performance mobile applications. I specialize in Mobile App Development with a focus on creating seamless user experiences and scalable solutions. My growing toolkit includes Flutter, Dart, Firebase, REST APIs, Git, UI/UX principles, and cross-platform development for Android and iOS. I am eager to leverage modern technologies to build impactful mobile applications.

EDUCATION

Bachelor Of Computer Application,(BCA) Yenepoya University	2023 – 2026 Banglore,Karnataka
Higher Secondary Education,(computer commerce) MPM HSS Chungathara	2021 – 2023 Malappuram,Kerala
Secondary Education,(SSLC) MPM HSS Chungathara	2020 – 2021 Malappuram,Kerala

EXPERIENCE

Flutter Mobile App Development

DataHex.

Technologies: Dart, Firebase

Duration: 3Month

Automate Detection of Different Emotions from Textual Comments and Feedback

TCS.

Python Full Stack

NodDesk.

Duration: 8Month

PROJECTS

CLOUD BASED FILE STORAGE SYSTEM

A cloud-based file storage system is a service that stores data on remote servers, accessible via the internet, rather than on a local hard drive. It offers convenient access from anywhere and uses a distributed architecture with redundancy to keep data safe. Popular examples include Google Drive, OneDrive, and Dropbox

COFFEE VIEW FLUTTER APP

I developed a 'Coffee Shop' Application using 'Flutter and Firebase'. The app includes Firebase Authentication, Forgot Password functionality, Cart Management, Order Placement, and Firestore database integration."

ACHIEVEMENTS

- Python NLTK for Beginners: Customer Satisfaction Analysis
- Creative Designing in Power BI
- TCS internship certificate
- Build a Multi-Page Website with Frontend Mentor, HTML, and CSS
- People & Soft Skills: Essential for Professional Success
- Flutter internship certificate
- Simple Linear Regression for the Absolute Beginner
- UI Design for Web Developers
